

Activity: Friendship Stick

You will need

Wide lolly stick or a strip of stiff card
 Colouring pens

Instructions

Make a friendship stick to give to a friend. Mark the stick into 10 sections as shown and colour in the sequence indicated below. The different colours mean different things:

Blue represents the blue sky under which we live

Blue eye represents life. Black eye is for death, we all have to die. Smiling face is the trademark of a friend. Red lips with an upward curve mean joy. May the smile never be false.

Green is for purity in thought, word and deed. Natural life.

The yellow, brown, white and black bands must be made equal in size, just as man is equal. They represent the various races making up the people of the world.

The red band means hope. Whatever happens there is always hope.

The blue band represents water, the source of life

The bottom brown band is symbolic of the earth on which we tread, standing steady and strong every day.

Risk Assessment

Who is at risk?	Beavers
What are the risks?	Minimal risk
How can the risks be minimized?	Adequate adult supervision
